.NET Cloud Developer with experience in system development, technical troubleshooting and integrations on Centiro's TMS platform. I have handled customer-related technical issues and analyzed system flows, integrations, logs and application logic to identify and resolve problems. I am now looking for a business-oriented IT role where I can contribute technical system understanding, structured troubleshooting and the ability to quickly learn how different systems and flows connect.

Work Experience

Jan 2026 – Aug 2026
Borås, Sweden

System Developer | Centiro Solutions AB

Internship Jan–May 2026, followed by fixed-term employment Jun–Aug 2026

- Worked with development, technical troubleshooting and integrations on Centiro's TMS platform.
- Troubleshot customer-related technical issues, both directly and through cases escalated from the support organization.
- Analyzed system flows, integrations, logs and application logic to identify root causes.
- Worked with integrations and APIs, analyzing data and JSON requests/responses during troubleshooting.
- Tested and quality-assured functionality and documented solutions.
- Took part in customer meetings on delivered services and technical questions.

Aug 2016 – Aug 2024
Gothenburg, Sweden

Truck Driver | THL Transportservice AB

- Handled transport and distribution, including daily planning and coordination of vehicles and drivers.
- Helped allocate routes, vehicles and drivers and managed ongoing changes in daily operations.
- Onboarded new drivers to routes and work procedures.

Nov 2011 – Jul 2012
Gothenburg, Sweden

Customer Service Representative | TeliaSonera AB

- Provided technical support and troubleshooting for digital services by phone and email.
- Handled a high volume of cases and explained solutions in a clear, user-friendly way.

Internship

Sep 2025 – Nov 2025
Gothenburg, Sweden

DevOps & Infrastructure Intern | Bonfire Cloud & Engineering

- Worked in a team to set up a small Software Factory environment with Kubernetes (k3s), GitLab and Argo CD.
- Gained hands-on experience with Linux, container-based operations, CI/CD and GitOps.
- Configured and troubleshot components in the environment, including Kubernetes resources, pipelines and deployment flows.

Education
